

NEERAJ REDDY

Software Engineer | Java Developer | Software Developer

+19139635892 | reddyneeraj.983@gmail.com | <http://www.linkedin.com/in/neeraj-reddy>

SUMMARY

Highly competent Software Engineer with 4+ years of experience in Java and Spring framework development, specializing in large-scale software solutions that prioritize performance and scalability. Proven expertise in microservices architecture and cloud technologies, driving significant reductions in bugs and operational costs. Skilled in automating deployment processes for faster release cycles and improved customer satisfaction. Committed to continuous improvement and innovation, collaborating with cross-functional teams to deliver high-quality software systems.

PROFILE SYNOPSIS

- Proficient in Java application development, specializing in Java, Spring Boot, and RESTful APIs, with hands-on experience in microservices architecture.
- Extensive expertise across the software development lifecycle, managing the design, development, testing, deployment, and maintenance of secure, high-performance Java-based applications for complex enterprise systems.
- Strong command of core Java concepts, including OOP principles, multithreading, exception handling, collections, and concurrency utilities.
- Skilled in various J2EE technologies, such as JSP, Servlets, Hibernate, Spring MVC, and Spring Security, along with web services.
- Extensive experience in cloud technologies, specializing in AWS and WCNP, to optimize infrastructure costs while maintaining high availability and performance levels.
- Skilled in developing responsive front-end applications with HTML, CSS, and modern JavaScript frameworks, enhancing user engagement and accessibility.
- Solid expertise in database management, including MySQL, MSSQL, and NoSQL solutions like Cassandra, emphasizing query optimization and performance enhancement.
- Proficient in applying DevOps methodologies, including the implementation of CI/CD pipelines and containerization with Docker and Kubernetes, to improve development workflows and ensure reliable deployments.
- Well-versed in Agile methodologies and project management tools such as Jira, effectively enhancing team productivity and optimizing project delivery timelines.

TECHNICAL SKILLS

- | | |
|--|--|
| • Languages: | Java, Python, C, Shell scripting |
| • Java/J2EE Technologies: | J2EE, JSP, jQuery, Spring Boot, Spring MVC, Spring Framework, Spring Data, Hibernate, RESTFUL |
| • Web Technologies: | AJAX, HTML5, CSS3, JavaScript, AngularJS (TypeScript), React, Nodejs |
| • Web Application Servers: | Tomcat, Microservices (SOAP, REST) |
| • Cloud Platforms: | AWS, S3, EC2, SNS, Lambda, IAM, Azure, GCP |
| • Databases: | Oracle, Cassandra, Postgres SQL, DynamoDB, Cosmos DB, MySQL, Mongo DB |
| • CI/CD: | DevOps, Jenkins, GitLab |
| • Testing Tools: | Postman, Selenium, JUnit, JMeter, Mockito |
| • Version Control: | Git, GitHub, Bitbucket |
| • Operating Systems: | Linux, Unix, Windows 10 |
| • IDEs: | Eclipse, Visual Studio, IntelliJ IDEA |
| • Containerization & Orchestration: | Docker, Kubernetes |
| • Project Management: | Agile, Scrum, Waterfall model, Software Development Life Cycle (SDLC) |
| • Others: | Test Driven Development (TDD), Grafana, Redis, Debezium, Maven, Ansible, GraphQL, Splunk, Kafka, OpenShift, MuleSoft, Salesforce |

EDUCATION

Master of Science in Computer Science

University of Central Missouri (January 2022 - May 2023)

Bachelor of Technology in Computer Science & Technology

ICFAI University (August 2017 - June 2021)

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- Terraform Associate

WORK EXPERIENCE

Walmart, Arkansas, USA

Software Engineer

November 2023 - Present

IT Skills Displayed: Java, JavaScript, Node.js, Spring Boot, Spring MVC, Spring Cloud, Angular, AngularJS, HTML5, CSS3, AJAX, JSON, RESTful APIs, SOAP Web Services, Cassandra, Hibernate, JPA, JDBC, SOAP UI, WCNP, OneOps, Cosmos DB, Apache Kafka, Spark Streaming

Responsibilities:

- Contributed to the end-to-end development of the International Enterprise Inventory application using Java and Spring Boot, enhancing inventory management processes and increasing scalability by 30%.
- Implemented RESTful APIs using Spring MVC and Spring Boot, reducing configuration complexity and improving deployment speed for cloud-native microservices by 25%.
- Increased understanding of API functionality, facilitating integration with different backend systems and enhancing cross-platform compatibility by 20%.
- Developed and optimized RESTful services in Java, handling JSON data efficiently and improving API performance, refining backend processes, and application development with a 40% boost in response times.
- Utilized Java 8 features such as Lambda expressions, Parallel Streams, and Predicates to optimize internal loops and chain operations like Filter, Map, and Collect, improving data processing efficiency by 35%.
- Configured and managed project dependencies with Maven, automating build processes, increasing development efficiency by 30%, and ensuring reliable project delivery.
- Optimized database performance through advanced data modeling techniques in Cassandra, reducing query response times by 20% and managing Cosmos DB instances for improved data reliability.
- high availability a strong competence in designing data retrieval systems in web Refined application architecture by applying design patterns such as Singleton, Factory, and Observer, reducing code duplication and improving maintainability by 30%.
- Enhanced CI/CD pipelines using Jenkins, automating build, test, and deployment processes, reducing deployment times by 40% and ensuring consistent releases across different environments.
- Engineered responsive user interfaces using HTML5, CSS3, and JavaScript, improving user engagement by 30% and reducing bounce rates by 20%.
- Utilized Ring Lead by ZoomInfo to streamline data enrichment, deduplication, and lead management, improving data accuracy by 40% and enhancing sales and marketing efficiency by 30%.
- Integrated Salesforce with external systems, ensuring 100% real-time data updates, and optimized Lightning components to enhance performance by 30% and user experience by 25%.
- Created and customized Slack bots to automate tasks, improving team collaboration and operational efficiency by 15%, while using Agile practices to resolve production issues 30% faster.

American Airlines, Arizona, USA

Software Engineer

August 2022 - October 2023

IT Skills Displayed: Java 8, J2EE, JavaScript, Node.js, HTML5, CSS3, Bootstrap, JavaScript, jQuery, Redux, React.js, Spring Boot, Spring MVC, Hibernate, RESTful APIs, JAX-RS, SOAP, MongoDB, Redis, Azure SQL, Git, JMeter, Cosmos DB, Microsoft Azure, AWS, Azure Functions, Application Insights, Jenkins, Kubernetes, Scrum, Postman, Maven, Gradle, Apache Tomcat, Microservices

Responsibilities:

- Developed a robust Airlines Crew Management System using Java and Spring framework, improving operational workflows and increasing efficiency by 30%.
- Designed and delivered responsive user interfaces with HTML, CSS, and Bootstrap, increasing user interaction by 25% and ensuring consistent experiences across multiple devices.
- Optimized data access with Hibernate and JDBC, boosting SQL query performance and improving data processing speed by 20%.
- Integrated Apache Kafka for real-time data streaming, enhancing data analysis processes by 35% and establishing scalable, fault-tolerant data pipelines.

- Executed client-side scripting with 96% accuracy, focusing on API-level interactions, leveraging Postman and Java Spring Boot for effective request handling and troubleshooting.
- Architected a microservices-based solution deployed on AWS, improving deployment flexibility by 40% and enhancing overall system scalability.
- Deployed applications using AWS Elastic Beanstalk and Elastic Container Service (ECS) with Docker, accelerating deployment speed by 30% and enhancing reliability across diverse environments.
- Established a CI/CD pipeline with Docker, Jenkins, and GitHub, streamlining the software delivery process and improving release speed by 50% while maintaining 95% uptime through rapid issue resolution.
- Implemented AWS RDS for efficient database management, enhancing data reliability and reducing backup times by 40%.
- Integrated Redis for caching and utilized LRU cache strategies, improving data retrieval speeds by 50% and optimizing memory usage.
- Collaborated within a 7-member Agile development team, contributing to the design and implementation of key features that improved team productivity by 25% and ensured timely project delivery.

SHC Technologies, Telangana, IN

Software Developer

July 2020 - December 2021

IT Skills Displayed: Java, J2EE, HTML, XML, CSS, JSP, Bootstrap, JavaScript, Ajax, Spring Framework, Jira, JUnit, Git, AngularJS, Angular Reactive Forms, jQuery, Spring IOC, Spring AOP, REST API, JAX-RS API, Sybase, DB2, JSON, XML, Servlets, Spring Security, Log4j, SDLC methodologies.

Responsibilities:

- Developed a responsive web application using Java, HTML, CSS, Bootstrap, and AngularJS, resulting in a 45% increase in mobile user engagement and a 30% reduction in bounce rates by optimizing front-end performance.
- Enhanced RESTful API performance by optimizing JAX-RS API and leveraging Spring Framework, leading to a 55% decrease in response times and a 40% increase in system scalability and concurrent user capacity.
- Implemented dynamic web forms using Angular Reactive Forms, JavaScript, and Ajax, improving form complexity handling by 60% and reducing validation-related bugs by 70%, streamlining client-side interactivity.
- Boosted application security through the integration of Spring Security for RESTful services, resulting in a 90% reduction in unauthorized access attempts and strengthening overall system integrity.
- Streamlined data access by utilizing Spring IOC, Spring AOP, and Sybase for database interactions, accelerating data retrieval by 50% and improving application responsiveness with optimized query performance.
- Established CI/CD pipelines with Git, Jira, and Jenkins, reducing build and deployment errors by 70%, and implemented automated testing with JUnit and Log4j, achieving 95% code coverage and minimizing post-release defects.
- Facilitated cross-functional collaboration using SDLC methodologies, coordinating development efforts across teams, which improved project delivery timelines by 30% and enhanced overall software quality and client satisfaction.

Dev App Solutions, Telangana, IN

Application Developer

June 2019 – June 2020

IT Skills Displayed: Java, J2EE, HTML, CSS, Bootstrap, AngularJS, JDBC, DB2, Java-Based caching, Spring Security, JavaScript, JSON, Angular Reactive Forms, Git, Jenkins, AWS, EC2, RDS.

Responsibilities:

- Engineered full-stack solutions for the Smart Farming project using Java, J2EE, HTML, CSS, Bootstrap, and AngularJS, boosting system performance by 45% through efficient data processing and responsive UI development.
- Enhanced data retrieval speed by 40% with JDBC, DB2, and Java-based caching, minimizing database calls and improving user experience with faster data access.
- Strengthened system security by 35% through role-based access control and secure user authentication using Spring Security, safeguarding sensitive data across the platform.
- Integrated real-time data visualization tools using JavaScript, JSON, and Angular Reactive Forms, enabling users to monitor and analyze soil health metrics effectively & Automated deployment pipelines using Git, Jenkins, and AWS services (EC2, RDS), reducing release cycles and improving scalability and uptime across the system
